DELPHINIUM

PACIFIC GIANT (Vetterle and Reinelt). This new strain produces plants that are 60 to 65 per cent mildew resistant. The flowers are of immense size, tightly set on straight stems that are strong and whippy. The flowers do not shatter and represent a truly outstanding addition to the cut flower market.

Blue Jay. Medium to dark blue with dark bee. Trade pkt., \$1.25; $\frac{1}{8}$ oz., \$2.50; $\frac{1}{4}$ oz., \$4.00; oz., \$14.00. No. 1.

Cameliard Series. This is a pure lavender self, with white bee, the individual flowers are very round and flat. Trade pkt., \$1.25; $\frac{1}{8}$ oz., \$2.50; $\frac{1}{4}$ oz., \$4.00; oz., \$14.00. No. 2.

Guinevere. Light pink lavender self with white bee. Individual floret $2\frac{1}{2}$ to 3 inches in diameter, large spikes. Excellent branching habits. For cut flowers and show purposes. Trade pkt., \$1.25; $\frac{1}{8}$ oz., \$2.50; $\frac{1}{4}$ oz., \$4.00; oz., \$14.00. No. 3.

King Arthur. Brilliant royal violet with large white bee. Individual florets $2\frac{1}{2}$ inches in diameter, very thin woody stems with small foliage. Very long graceful spikes. Trade pkt., \$1.25; $\frac{1}{8}$ oz., \$2.50; $\frac{1}{4}$ oz., \$4.00; oz., \$14.00. No. 4.

Round Table Series. As the name implies this represents all of the color combinations of the above Knights and their Ladies. This year some three hundred different crosses were used to make up this group, combining all the newest color developments and possessing size that will make them invaluable for show purposes. Trade pkt., \$1.25; $\frac{1}{8}$ oz., \$2.50; $\frac{1}{4}$ oz., \$4.00; oz., \$14.00.

For other varieties see body of catalog.

SAPONARIA VACCARIA ROSE. A fine annual for cutting. Sometimes called "Pink Gypsophila." Light graceful sprays of glistening pink flowers produced in greatest profusion. Sow at intervals during the summer for continuous supply. This picture was taken by us last summer and the flowers remained afterwards in our office for several days in good condition. Oz., 15c; $\frac{1}{4}$ lb., 45c.

Sell Vaughan's Vegetable Seeds

• FOR VICTORY GARDENS •

Sales of vegetable seeds doubled in 1942, and in 1943 they are expected to double again. Millions of gardeners who have grown only flowers will make a place for vegetables in 1943; and you must have vegetable seeds to sell. If not, they will take their trade elsewhere. Our assortments include both vegetable and flower seeds.

OUR RED, WHITE AND BLUE RACK FOR 1943

Red, White and Blue Display

We shall continue to use for 1943 the strikingly beautiful Victory Garden Display Rack designed in our national colors. The slogan on the lower panel has been changed to read "Garden for Victory with Vaughan's Seeds." The top panel will be red, the lower one white, and the sides and bottom will be blue. It makes a brilliant eye-catching combination and will give your store a patriotic atmosphere.

Design and construction of the rack will otherwise follow the model which has proved so satisfactory last year.

The illustration shows how it holds each variety where the customer can see it.

The dimensions of this rack are: 30 inches wide, 15 inches deep, on the floor. The height is 55 inches, nicely calculated to combine maximum visibility of packets, and convenient self-service, while at the same time it does not obstruct a clear view of the store, which many feel is important.

Your new rack will be light, yet strong, easily moved about. It is made in the modern manner, of heavy matboard, and comes to you brand new. One rack will hold \$100 worth of packets.

Our New Packets. All flower seed packets of 1943 will be 3¼ by 4½ inches, same size as vegetable packets, and all racks will be interchangeable, serving for either flower or vegetable seed.

Brilliantly Colored Posters and Streamers. Color sells everything now-a-days and nowhere is it more necessary than in selling the garden. Vaughan's posters are modern, artistic, brilliant. They will dress up your store and give it the atmosphere of spring, helping business in every line.

Vaughan's Novelties and Specialties for 1943

PETUNIA. All-Double America

ALL-AMERICA WINNERS

PETUNIA All-Double America. Silver Medal All-America 1943. America is the all-double type, of medium size, carnation-flowered, and rose-pink in color, somewhat a reminder of the color of *Gladiolus America*, which for many years was our most popular Glad. America Petunia is a hybrida nana, an abundant bloomer from early summer to frosts, for bedding and cutting. It is uniform and true. 200 seeds, 75¢; 500 seeds, \$1.75; 1000 seeds, \$3.00; 1/64 oz., \$11.00.

MARIGOLD, Sunkist. Silver Medal All-America 1943. It is a dwarf, compact, very early, continuous blooming, double French Harmony type. It comes practically true, 6 to 12 inches tall, and the many attractive flowers are to 1 1/2 in. across. For bedding, edging and pot-culture. Companion variety for the already popular Butterball. Trade pkt., 35¢; 1/4 oz., 70¢; oz., \$2.40.

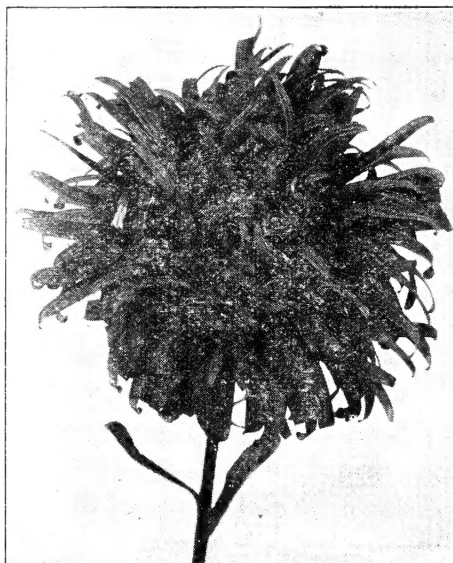

PETUNIA Igloo. Bronze Medal All-America 1943. A new extra compact white Petunia. The chief advantages of this new Petunia are its free blooming habit and its compact and uniform growth. The flowers are medium size, pure white with a slight yellowing in the throat, and are 100% true. Every flower is just exactly alike. The fact that the plant remains so uniformly compact throughout the entire season (if the soil is not too rich) makes it ideal for borders. Every plant is a perfect mound of white 8 to 10 inches high, reminding one of an Eskimo igloo. Trade pkt., 50¢; 1/32 oz., \$1.00.

ASTER, Extra Early Giant Crego, Navy Blue. Honorable Mention All-America 1943. First of a new race of large flowered, early Asters. In fact, it seems as early as Queen of the Market class, so should be quite satisfactory also in the South. While not wilt-resistant, it has fair growth, true and uniform 4 inch flowers on 12 to 20 inch branching plants and averaging 10 inch, strong cutting stems. Narrow, purplish green foliage and stems. 1/8 oz., 50¢; 1/4 oz., 85¢; oz., \$2.50.

ASTER Victory Giants Mixed. All-America Honorable Mention 1943. This is an extra early Giants of California Type. It has strong straight cutting stems on sturdy branching plants 3 feet tall. Crown flowers average 5 inches across, and colors include salmon pink not found in the California type and are with out reds. Trade pkt., 50¢; 1/4 oz., \$1.25; oz., \$4.00.

COSMOS, Giant Sensation, Dazzler. Honorable Mention All-America 1943. Very rich, deep amaranth crimson, 3 to 4 inch flowers on plants from 30 inches as they start blooming to an ultimate 5 to 6 feet. Vaughan's The World's Best Flower Seeds

Seed Stocks Are Short!

All the flowers you can grow this year will be assured of a market at good prices. Production has been short and all indications are that it will continue so; while demand is at a record level. In spite of the difficulties due to war, we hold stocks or expect delivery of every item listed. Since replacements are uncertain, however, we urge you to order early, to make sure of obtaining your season's requirements in full. A heavy demand for vegetable plants in the spring should be expected.

Buyers of seeds are dependent upon the experience, ability and integrity of the seedsmen to insure the quality and identity of the seeds they buy. Our customers are protected by the skill of an organization which for more than sixty years has specialized in seeds for florists.

Carl Cropp, vice president of Vaughan's Seed Store since 1884, and his son Carl Jr., are in touch with expert growers; by frequent inspection trips and careful checking in our trial gardens, they make sure that we supply you with the best seeds obtainable in the world.

TESTING AND TRIALS Every lot of flower seed sold by us is tested in OUR OWN laboratory, where we prove the germination and make certain that the percentage is up to the high level of our standards. Trueness to type is determined and checked by the hundreds of tests grown in our greenhouses and trial grounds.

Flower Seeds for Summer Sowing.—We issue a special catalogue in June. Should you fail to receive one, please write for it.

For Seeds of Perennials and Biennials, see pages 37 to 50.

Trade packets contain considerably more seed than ordinary or retail packets, being based on Florists' needs for ordinary purposes.

Florists invariably get trade packets unless otherwise specified.

Quantities of $\frac{1}{4}$ lb. and over are charged at the pound rate; unless stated otherwise, $\frac{1}{8}$ lb. is at the oz. rate; $\frac{1}{2}$ oz. is at the ounce rate only when the price per ounce is 20c or more and $\frac{1}{2}$ oz. rate is not otherwise quoted.

We do not sell $\frac{1}{2}$ oz. where the price per ounce is 15c or less.

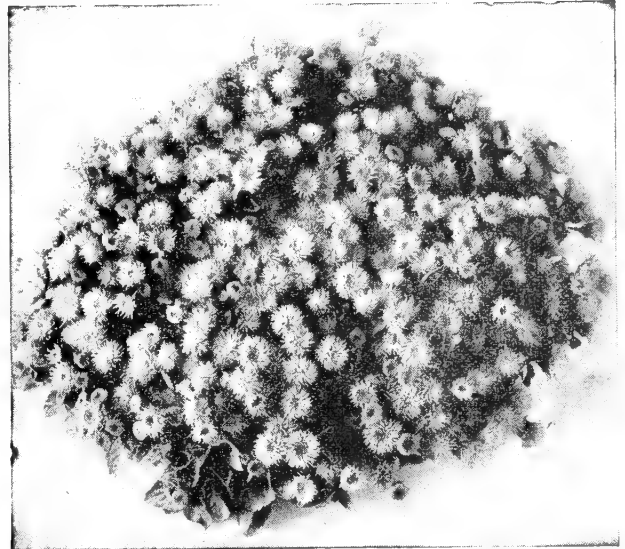

Cash Discounts on Flower Seeds: On all orders for flower seeds, totaling less than \$25.00, 5%, and over \$25.00, 8%, may be deducted if cash is enclosed, except Cyclamen seed, which is net.

"Personally I will take my hat off any time to Snapdragon St. George. I think it has the most substantial kind of blossom that any Snapdragon could possibly have and the size of the blossoms together with the color, immediately attracts the attention of the visitors."

ASTER VAUGHAN'S WILT RESISTANT. GIANT BRANCHING AND CREGO TYPES.

Asters

WILT-RESISTANT

Asters have been widely attacked by the Fusarium Wilt, which condition has been overcome in growing the Wilt-Resistant Strains, which, although grown in infected soil, proved immune to the disease. Aster Yellows is also an enemy. This has been found to be transferred to the plants by tiny insects called leaf hoppers, and the only way to overcome this is to grow the plants under a cloth cover.

As the roots of Asters are produced near the surface, a mulch of some kind spread over them in hot weather is very beneficial and will be repaid by fine plants, large blooms, stronger stems, and more profuse blooming.

AURORA

Golden Sheaf, yellow self. A splendid free-flowering aster, with large full flowers, quilled centers and outer band of broad petals. Height, 2 ft. Fine for cutting. Trade pkt., 30c; 1/4 oz., 60c; oz., \$2.00.

CREGO—2 feet

This flower is giant in size, many blossoms six inches across. The petals are nearly double the length of the older varieties and are twisted and curled into a very fluffy effect. Comes into bloom in August, continuing well into September. A splendid keeper and shipper.

• Sell Vaughan's Vegetable Seeds

• FOR VICTORY GARDENS •

Sales of vegetable seeds doubled in 1942, and in 1943 they are expected to double again. Millions of gardeners who have grown only flowers will make a place for vegetables in 1943; and you must have vegetable seeds to sell. If not, they will take their trade elsewhere. Our assortments include both vegetable and flower seeds.

OUR RED, WHITE AND BLUE RACK FOR 1943

Red, White and Blue Display

We shall continue to use for 1943 the strikingly beautiful Victory Garden Display Rack designed in our national colors. The slogan on the lower panel has been changed to read "Garden for Victory with Vaughan's Seeds." The top panel will be red, the lower one white, and the sides and bottom will be blue. It makes a brilliant eye-catching combination and will give your store a patriotic atmosphere.

Design and construction of the rack will otherwise follow the model which has proved so satisfactory last year.

The illustration shows how it holds each variety where the customer can see it.

The dimensions of this rack are: 30 inches wide, 15 inches deep, on the floor. The height is 55 inches, nicely calculated to combine maximum visibility of packets, and convenient self-service, while at the same time it does not obstruct a clear view of the store, which many feel is important.

Your new rack will be light, yet strong, easily moved about. It is made in the modern manner, of heavy matboard, and comes to you brand new. One rack will hold \$100 worth of packets.

Our New Packets. All flower seed packets of 1943 will be 3¼ by 4½ inches, same size as vegetable packets, and all racks will be interchangeable, serving for either flower or vegetable seed.

Brilliantly Colored Posters and Streamers. Color sells everything now-a-days and nowhere is it more necessary than in selling the garden. Vaughan's posters are modern, artistic, brilliant. They will dress up your store and give it the atmosphere of spring, helping business in every line.

Vaughan's Novelties and Specialties for 1943

PETUNIA. All-Double America

ALL-AMERICA WINNERS

PETUNIA All-Double America. Silver Medal All-America 1943. America is the all-double type, of medium size, carnation-flowered, and rose-pink in color, somewhat a reminder of the color of Gladiolus America, which for many years was our most popular Glad. America Petunia is a hybrida nana, an abundant bloomer from early summer to frosts, for bedding and cutting. It is uniform and true. 200 seeds, 75¢; 500 seeds, \$1.75; 1000 seeds, \$3.00; 1/4 oz., \$11.00.

MARIGOLD, Sunkist. Silver Medal All-America 1943. It is a dwarf, compact, very early, continuous blooming, double French Harmony type. It comes practically true, 6 to 12 inches tall, and the many attractive flowers are to 1 1/2 in. across. For bedding, edging and pot-culture. Companion variety for the already popular Butterball. Trade pkt., 35c; 1/4 oz., 70c; oz., \$2.40.

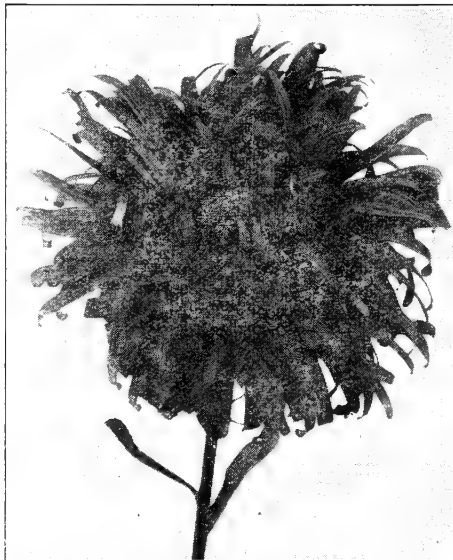

PETUNIA Igloo. Bronze Medal All-America 1943. A new extra compact white Petunia. The chief advantages of this new Petunia are its free blooming habit and its compact and uniform growth. The flowers are medium size, pure white with a slight yellowing in the throat, and are 100% true. Every flower is just exactly alike. The fact that the plant remains so uniformly compact throughout the entire season (if the soil is not too rich) makes it ideal for borders. Every plant is a perfect mound of white 8 to 10 inches high, reminding one of an Eskimo igloo. Trade pkt., 50c; 1/2 oz., \$1.00.

ASTER, Extra Early Giant Crego, Navy Blue. Honorable Mention All-America 1943. First of a new race of large flowered, early Asters. In fact, it seems as early as Queen of the Market class, so should be quite satisfactory also in the South. While not wilt-resistant, it has fair growth, true and uniform 4 inch flowers on 12 to 20 inch branching plants and averaging 10 inch, strong cutting stems. Narrow, purplish green foliage and stems. 1/8 oz., 50c; 1/4 oz., 85c; oz., \$2.50.

ASTER Victory Giants Mixed. All-America Honorable Mention 1943. This is an extra early Giants of California Type. It has strong straight cutting stems on sturdy branching plants 3 feet tall. Crown flowers average 5 inches across, and colors include salmon pink not found in the California type and are with out reds. Trade pkt., 50c; 1/4 oz., \$1.25; oz., \$4.00.

COSMOS, Giant Sensation, Dazzler. Honorable Mention All-America 1943. Very rich, deep amaranth crimson, 3 to 4 inch flowers on plants from 30 inches as they start blooming to an ultimate 5 to 6 feet. The flower size, color shades and a few plants showed variance in the trials, chiefly showing with the few taller, later blooming plants. Trade pkt., 25c; 1/4 oz., 55c; oz., \$1.80.

PETUNIA, English Violet. Honorable Mention All-America 1943. This rosy mauve-violet or purple-violet, medium-sized, hybrida nana variety brings a distinct new color to this class. With the habit of Blue Bedder, this very free-flowering plant of 12 to 15 inches is true and uniform. Trade pkt., 50c.

ASTER. Extra Early Giant Crego, Navy Blue

MARIGOLD. Sunkist

AGERATUM

Dwarf Blue Bedder. The average height of Dwarf Blue Bedder is four inches. The habit of growth is uniform, and the compact little plants are alive with large clusters of deep lavender-blue flowers. The coloring is richer and deeper than that of Blue Ball Improved. Ideal as an edging or low border. Trade pkt., 50c; 1/4 oz., \$1.25; oz., \$4.00.

Golden Ageratum. This is called an Ageratum, as the effect of fluffy golden balls, carried in many close clusters, resembles the perennial ageratum, but this is an annual whose botanical name is *Lonas Inodora*. 12 in. Trade pkt., 50c.

ANTIRRHINUM Majus Grandiflorum Rust Resistant Reveille. 22 in. Softly tinted by the golden rays of an early sunrise, Reveille is a deep luminous yellow with the upper lip of each floret toning to a lighter lemon yellow. Base branching habit, each plant producing several large spikes of bloom. Trade pkt., 50c.

ASTER Giant Harmony. Fine new florist type, long stems, basal branching 4 to 4 1/2 in. flowers with quilled centers.

Moonlight. (Azure Blue)

Sunrise. (Soft apricot pink)

Morning Mist. (Mid Blue)

Each of the above: Trade pkt., 30c; 1/4 oz., 60c; oz., \$2.00.

BEGONIA SEMPERFLORENS

Ile de France. The best white. The foliage is identical to Christmas Cheer, only light green. The flowers are 1 1/4 in. to 1 1/2 in., pure white, with bright yellow stamens. They grow in compact form, not to exceed 12 in. in height and approximately the same width. Trade pkt., \$1.00; 1/4 oz., \$2.00.

Masterpiece. One of the largest flowered fibrous rooted Begonias, and the clear rose-pink blossoms have made it a great favorite. The flowers fairly cover the foliage. Trade pkt., \$1.00.

Vaughan's ^{The} World's ^{Best} Flower Seeds

Seed Stocks Are Short!

All the flowers you can grow this year will be assured of a market at good prices. Production has been short and all indications are that it will continue so; while demand is at a record level. In spite of the difficulties due to war, we hold stocks or expect delivery of every item listed. Since replacements are uncertain, however, we urge you to order early, to make sure of obtaining your season's requirements in full. A heavy demand for vegetable plants in the spring should be expected.

Buyers of seeds are dependent upon the experience, ability and integrity of the seedsmen to insure the quality and identity of the seeds they buy. Our customers are protected by the skill of an organization which for more than sixty years has specialized in seeds for florists.

Carl Cropp, vice president of Vaughan's Seed Store since 1884, and his son Carl Jr., are in touch with expert growers; by frequent inspection trips and careful checking in our trial gardens, they make sure that we supply you with the best seeds obtainable in the world.

TESTING AND TRIALS Every lot of flower seed sold by us is tested in OUR OWN laboratory, where we prove the germination and make certain that the percentage is up to the high level of our standards. Trueness to type is determined and checked by the hundreds of tests grown in our greenhouses and trial grounds.

Flower Seeds for Summer Sowing.—We issue a special catalogue in June. Should you fail to receive one, please write for it.

For Seeds of Perennials and Biennials, see pages 37 to 50.

Trade packets contain considerably more seed than ordinary or retail packets, being based on Florists' needs for ordinary purposes.

Florists invariably get trade packets unless otherwise specified.

Quantities of $\frac{1}{4}$ lb. and over are charged at the pound rate; unless stated otherwise, $\frac{1}{8}$ lb. is at the oz. rate; $\frac{1}{2}$ oz. is at the ounce rate only when the price per ounce is 20c or more and $\frac{1}{2}$ oz. rate is not otherwise quoted.

We do not sell $\frac{1}{2}$ oz. where the price per ounce is 15c or less.

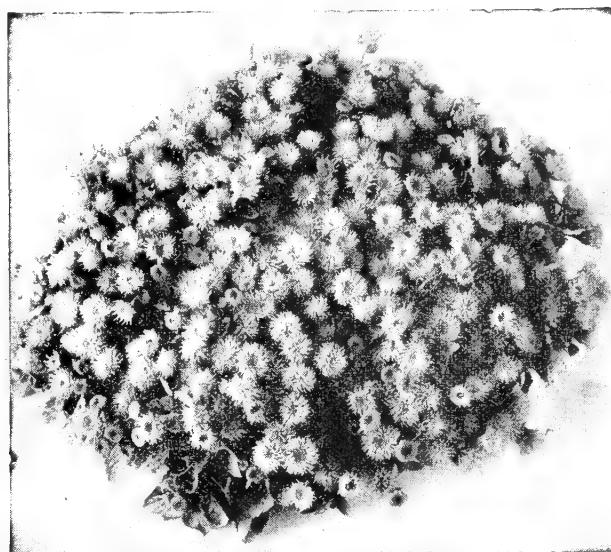

Cash Discounts on Flower Seeds: On all orders for flower seeds, totaling less than \$25.00, 5%, and over \$25.00, 8%, may be deducted if cash is enclosed, except Cyclamen seed, which is net.

"Personally I will take my hat off any time to Snapdragon St. George. I think it has the most substantial kind of blossom that any Snapdragon could possibly have and the size of the blossoms together with the color, immediately attracts the attention of the visitors."

ASTER VAUGHAN'S WILT RESISTANT. GIANT BRANCHING AND CREGO TYPES.

Asters

WILT-RESISTANT

Asters have been widely attacked by the Fusarium Wilt, which condition has been overcome in growing the Wilt-Resistant Strains, which, although grown in infected soil, proved immune to the disease. Aster Yellows is also an enemy. This has been found to be transferred to the plants by tiny insects called leaf hoppers, and the only way to overcome this is to grow the plants under a cloth cover.

As the roots of Asters are produced near the surface, a mulch of some kind spread over them in hot weather is very beneficial and will be repaid by fine plants, large blooms, stronger stems, and more profuse blooming.

AURORA

Golden Sheaf, yellow self. A splendid free-flowering aster, with large full flowers, quilled centers and outer band of broad petals. Height, 2 ft. Fine for cutting. Trade pkt., 30c; 1/4 oz., 60c; oz., \$2.00.

CREGO—2 feet

This flower is giant in size, many blossoms six inches across. The petals are nearly double the length of the older varieties and are twisted and curled into a very fluffy effect. Comes into bloom in August, continuing well into September. A splendid keeper and shipper.

Chrysanthemum

Chrysanthemums provide long stemmed cut flowers which are useful to a florist. The annual varieties, especially the Carinatum and Segetum, are probably most generally used. They are easily grown from seed, coming into flower early. Attractive colors both for inside or outside growing. Eastern Star, Gloria (Morning Star). and Helios (Evening Star) are the most called for varieties.

Carinatum Vaughan's Rainbow Mixture. A surprising blend of entirely new shades and color combinations in Annual Chrysanthemums. This wonderful new strain of Carinatum Hybrids contains a very wide range of various tones running through purple, scarlet, orange, salmon, rose, yellow, white, which are all beautifully zoned round the dark discs with small yellow edges. These zones differ both in color and size to a remarkable degree and comprise many different shades of deep purple, maroon, copper and orange. The very free flowering 2 feet high plants are early blooming, coming into flower 2 months from the time of sowing; from June until September they give a truly amazing display. As a cutflower this lovely Chrysanthemum will prove of outstanding value.

Seeds of Biennials and Hardy Perennials

Perennials fill a large and interesting place in the operations of an up-to-date florist establishment. Some are as easily raised as annuals; quite a few may be forced; others make fine pot plants; and many furnish splendid cutting material. The rock garden requirements absorb all the low-growing varieties and the florist with his eye to the future will devote considerable space to perennials of all kinds. They require little heat, if any, and not much care.

SEED GERMINATES SLOWLY AND IRREGULARLY

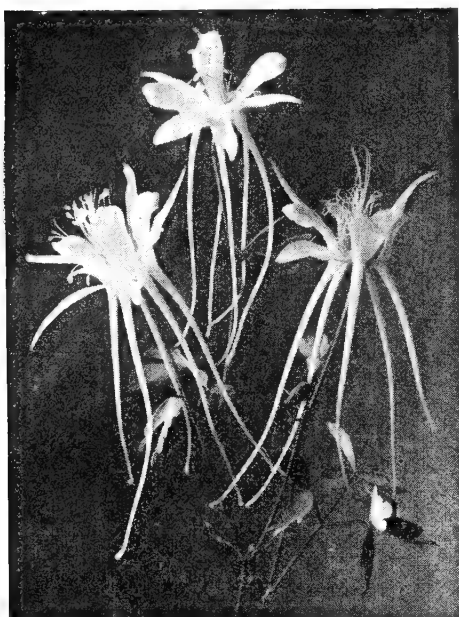

of the following varieties and seed bed should be prepared where it will be undisturbed for a year or more.

Aconitum, Anemone, Clematis, Delphinium Cardinale, Delphinium, Delphinium Nudicaule, Dictamnus, Dielytra, Doronicum, Helleborus Niger, Incarvillea, Iris, Phlox Decussata, Primulas (Alpine) Trollius and nearly all Alpines.

Russell Lupinus

A MARVELOUS SELECTION OF PERENNIAL LUPINS

Most unusual colors and color combinations; some flowers are self colors and many bicolors, the standard being of one color and the keel of another. The flowerettes are much larger than the other Polyphyllus varieties. The spikes are crowded with blossoms and resemble a closely set well rounded column of Sweet Peas. Useful as a cut flower.

The Russell Lupins have three virtues, not including color, that the older varieties lacked: ability to travel well when cut, less tendency for the lower flowers to fade before the whole spike is out and excellent keeping qualities in the house.

Grown from originator stock seed.

Lilies—Bulbs From Cold Storage

Vaughan's Shangri-La

Shangri-La lilies are of the Floridii Creole type, of the highest quality.

They come to you with live roots packed in peat moss, like Croft lilies from the Pacific coast.

Accurately checked scientific tests have shown that they produce twice the bud count of ordinary rootless Creole bulbs of comparable size, because they start growing without check, or taking time to produce new roots.

Culture is like other Creoles, growing cool to keep down their height, and for best quality. The variety is naturally early.

6-7 inch. Per 100, \$16.00; per case of 400, \$60.00.

LILIUM FLORIDI

Bulbs of the Creole type, grown in Florida, have shown certain improvements over the Louisiana Creole lilies. At our New York branch, 47 Barclay street, New York City, a limited number of bulbs of the best type of Floridii are still on hand, and prices will be furnished in answer to inquiries mailed to that address.

SHANGRI-LA—FLORIDI CREOLE TYPE LILIES

LILY FORCING

At the present time there are several kinds of lilies that will take the place of those formerly imported from Japan and used for forcing. These fall into groups both as to the flower and also culture. Creole is a lily that has been grown in the south for a number of years, but only in recent years has enough of it been forced to be able to learn much about it. Floridii and Shangri-La are types of Creole lilies requiring the same treatments and having similar growth. Croft, Coos, Kenyon Davidson (Early Western, B1), and Ace are from the west coast and are all of the same general type of the Giganteum and require similar treatment and timing for best results. Howardii is a Harrisii type and requires the cool treatment that variety has always required. Regales have been used for forcing but since it is not a white lily and better varieties are now available, its use is not much recommended at the present time. White Queen is being grown from seed but since it does not have the substance of the other varieties and requires over a year in the greenhouse, we will not discuss it here.

Because the Creole types are grown in the south and have an earlier harvesting season, they are more rapidly grown for early cut flower trade than the western lilies. They have size and substance and can be grown on long heavy stems, and have been in good demand in that work. Naturally by storage treatment they may be held for later planting. They are better grown at a cooler temperature, starting them 50°, then later raising to 55°, which suits them well. They require a little more care during the early stages, as they do not make as strong root growth at the base. Since the older plantings of Creoles were not kept from mosaic, much roguing has been necessary and all stocks of it on the market may not be properly rogued. Since it spreads rapidly by aphid infestation, all stock should be kept clean and mosaic types kept away from clean types.

The west coast types require the same treatment as Giganteum, preferring 60 degrees except during that period between emergence from the soil and approximately 8 inches high, at which stage buds are normally set. The temperature should be reduced during this period in order to increase the bud count (52-55 degrees). To time them the same rules would apply that do to the gigs, and if necessary to push them, they may be handled the same way with similar results.

We have made many experiments with American grown lilies and have dozens more at the present time. Exact rules cannot be laid down on any of these lilies, but certain rules seem to be evident. All of these American lilies are normally heavy foliaged and good growers, so need plenty of room and light. They need a well drained and well aerated soil, and should be planted deep enough so that the feeder roots on the stem will develop properly. If they have this kind of soil they can stand some fairly nutrient levels after they are growing well, but not during the rooting stage. Avoid a high nitrate soil, particularly greenhouse bench soil that has considerable feed in it. Bud blasting may occur if nutrient levels are not balanced, if soil is not aerated or if high temperature with poor lighting is practiced. They will not root as well at cool temperatures as they will at growing temperatures. Storage treatments should be given, the amount and temperature depending upon the harvesting date, the intended forcing date and the type as well as the size. While considerable work has been done by us on this, we are carrying on extensive tests all the time, to further our knowledge on this vital point.

One final statement—we consider American grown bulbs better than any Japanese bulbs that we have had for many years, and we can continue to have them better.

DOUBLE BEGONIA

ACHIMENES

AMARYLLIS

Large Flowering Hybrids

One of the finest strains of Amaryllis we have ever seen, raised by eminent growers whose stock and hybridization for many years we have purchased in its entirety. Flowers are immense, borne as a rule four to a stem, in an amazing and beautiful range of colors, blended, splashed and striped in a manner not seen in other strains.

ACHIMENES

This is closely related to the Gloxinia. Plant 6 to 7 bulbs in a 5-inch pot, or 9 to 10 in a 6-inch pot. The soil used for potting should be rich in humus and of an open, porous nature, allowing perfect drainage. A good mixture to use is equal parts of loam, leaf mold and sand. About one-third of the depth of the pots or pans should be occupied with drainage. After the young growth appears, great care should be taken to keep the soil moist, for a single severe drying will ruin the plant. Blooming time 8 to 10 weeks after planting.

BEGONIAS

Tuberous-Rooted

Every florist should grow some of these bulbs, as they make showy plants that find ready sales in the spring and summer. Use 4-inch pots and shift later to 5 and 6-inch pots if larger plants are wanted. A compost of one part rotted cow manure to two parts loam and one part leaf mold will give good results. Water sparingly until growth is started. They like a 55-58 degree temperature at night.

Vaughan's Cannas

In our list of sorts will be found all the good old standard kinds and many of the best Novelties, the inferior kinds being discarded every year as the Merits of the Newer ones are proven. Cannas are becoming more popular. The new Varieties with large flowers in new colors are unequalled for creating a colorful show from July to Frost. They do best in full sun and respond quickly to feeding.

Price for Dormant Roots up to APRIL 1st. All have green foliage unless otherwise specified; 25 at 100 rate; 250 at 1000 rate. Not less than 25 sold wholesale.

The Big Four

Improved Florence Vaughan	Owing no doubt to a deterioration in breeding stock, plants distributed under the name of Florence Vaughan have for several years been decidedly smaller, and inferior in color to the original variety, introduced by us. Making a search for stock of the original quality, we found it in Europe, and have propagated from carefully selected specimens to produce the improved type offered here. Giant flowers of vivid golden yellow, sprinkled with fine red dots, are borne on strong 4-foot stems. In our judgment, the best of all yellows.	Per 100	Per 1,000
Green foliage.....		\$7.00	\$60.00

King Humbert 4-FT. SCARLET FLOWERS, BRONZE LEAVES, GREATEST FAVORITE TODAY. This remarkable "Gold Medal" Canna has been the sensation of the past nine years. It is a cross between the orchid-flowering and the French or Crozy type, combining the best features of both, the large flowers of one with the free-blooming character of the other, and the handsome broad, tropical foliage. Dormant roots.....	3.75	32.50
---	------	-------

Yellow King Humbert 4 feet. An orchid-flowering sport of the well known variety King Humbert. Has the same habit of growth as its parent; foliage a very dark green, with flowers measuring 5 to 7 in. across; individual petals 3 to 3½ in. in diameter. Color of flower a deep rich yellow, softly spotted and blotched with bright red. Some plants will occasionally give a scarlet or scarlet-striped flower, which we consider an improvement rather than a defect. Dormant Roots.....	3.75	32.50
---	------	-------

The President 4 ft. In color a rich glowing scarlet with immense rounded flowers seven inches across when fully open, produced on strong, erect stems well above the large green foliage. Free-bloomer and strong grower. Dormant Roots.....	3.75	32.50
---	------	-------

Choice Varieties

AMBASSADOR. 3½ to 4 ft. Considered an improved King Humbert. Bronze foliage; color poppy-red; very brilliant. Flowers are borne in immense trusses on strong stalks well above the foliage, the petals measuring 2 to 2½ inches across. Plant is very vigorous. Dormant Roots.....	\$ 4.50	\$40.00
---	---------	---------

COPPER GIANT. 3½ ft. Much admired in our Western Springs planting. Large attractive blooms of a coppery madder red in big clusters on stout stems; green foliage. Exceptionally free-flowering and stocky growth. If you do not know this variety, give it a trial.....	7.00	60.00
--	------	-------

EUREKA. 4 ft. Remarkably free-flowering variety, and with its striking white flowers which first appear cream, makes a very effective show in conjunction with a good scarlet such as King Humbert. Dormant Roots.....	10.00	90.00
---	-------	-------

HUNGARIA. 3½ feet. Very compact, almost dwarf, and luxuriant growth. Leaves bluish green, never burn. Flowers La France pink. Dormant Roots.....	4.00	35.00

The Yield and Quality of Vegetation Depend Upon Continuous and Rapid Growth.

● The ceiling prices given below on this page are those in effect at the time this catalogue goes to press. Freshly Packed and Tested Lawn Seed in 1944 for Your Unsold 1943 Stock

Federal Seed Law Requires Dated Germination Tests

OUR dealers can purchase cartons and 5-lb. bags of our branded seed with no fear of carrying over out-dated seed into the following year. We will allow unsold packages to be returned to us and replace them with freshly packed and tested seed the following spring.

Dealers who have tried this plan report that it enables them to keep up stocks and get maximum sales throughout the season with no fear of inventory losses.

This offer is NOT in any way to be considered on a consignment basis but is solely for the protection of our dealers against having to carry into the following year unsalable, outdated and soiled cartons.

The terms of payment are absolutely the same as heretofore.

This offer does not apply in any way whatsoever to bulk seed or non-branded seed and this is in no way to be considered a guarantee sale. All seed to be exchanged must positively be returned to us prepaid by December 1, 1942, and replacement will be made by March 1, 1943.

NOTE—We cannot accept broken cartons and wet or otherwise damaged seed for exchange.

For Your Protection

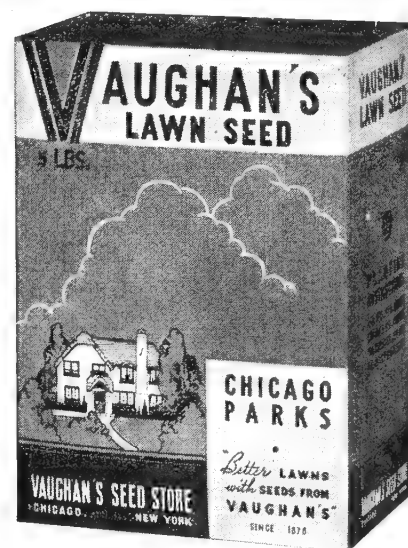

All our grass seeds are carefully analyzed in our own fully equipped laboratory and tagged or labelled to conform to the complicated requirements of the state laws. Errors in labelling might be costly and troublesome. Play safe.

With each of the deals below we furnish the vividly colored window streamer illustrated on the opposite page.

Freshly Packed and Tested Lawn Seed in 1944 for Your Unsold 1943 Stock

**Federal Seed Law Requires Dated
Germination Tests**

OUR dealers can purchase cartons and 5-lb. bags of our branded seed with no fear of carrying over out-dated seed into the following year. We will allow unsold packages to be returned to us and replace them with freshly packed and tested seed the following spring.

Dealers who have tried this plan report that it enables them to keep up stocks and get maximum sales throughout the season with no fear of inventory losses.

This offer is NOT in any way to be considered on a consignment basis but is solely for the protection of our dealers against having to carry into the following year unsalable, outdated and soiled cartons.

The terms of payment are absolutely the same as heretofore.

This offer does not apply in any way whatsoever to bulk seed or non-branded seed and this is in no way to be considered a guarantee sale. All seed to be exchanged must positively be returned to us prepaid by December 1, 1942, and replacement will be made by March 1, 1943.

NOTE—We cannot accept broken cartons and wet or otherwise damaged seed for exchange.

For Your Protection

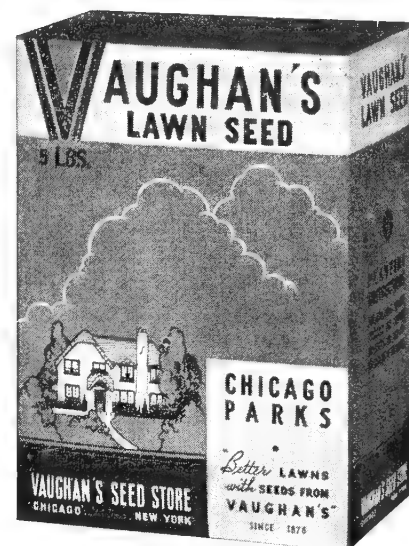

All our grass seeds are carefully analyzed in our own fully equipped laboratory and tagged or labelled to conform to the complicated requirements of the state laws. Errors in labelling might be costly and troublesome. Play safe.

With each of the deals below we furnish the vividly colored window streamer illustrated on the opposite page.

Gladiolus Display Box Holding 500 1st Size Bulbs, 50 each of 10 Named Varieties

F. O. B. Chicago or New York

VAUGHAN'S GLADIOLI are famous. For years they have been nationally advertised. You have only to put this box on your counter to sell out quickly.

We use **FIRST SIZE BULBS**, the size which sells best over the counter. The 10 named varieties (50 each) include the show winners **Picardy, Maid of Orleans, Dr. Bennett, Dearborn, Margaret Fulton, Giant Nymph, Gold Eagle, Minuet, Pelegrina, Red Phipps**—none better known. The price to you is \$8.00 for the box and 500 bulbs of 10 named varieties. You retail them for 40c a dozen, or more, because the selection is worth more, doubling your money. Each variety is packed 50 in a bag labeled with its name. You empty one bag into a compartment, and refill in the same manner when it is empty. This prevents mixtures and loss of bulbs. After the display box and first collection have been bought, refill orders will be accepted for \$7.50 for 500 bulbs, 50 each of 10 varieties, in bags of 50; or \$14.50 for 1,000 bulbs, 100 each of ten varieties. Colored pictures are provided to paste on the compartments. This box keeps the bulbs in the open air, thus preventing bacterial rot which comes when they are sealed in cartons. The named varieties are kept apart without mixing, which adds greatly to their value. **Varieties Subject to Change Without Notice.**

Sell Vaughan's Famous Rainbow Garden of Gladioli (100 No. 3 bulbs)

Each: \$1.50; 10 for \$14.00; 20 for \$27.00; Prepaid 600 Miles.

Retailing at \$2.00, this is an unexcelled leader. It includes 100 bulbs, 10 each of the following varieties, each separately bagged and labeled: **Dr. Bennett**, red; **Mary Shary**, yellow; **Maid of Orleans**, white; **Dearborn**, orange; **Beacon**, salmon scarlet; **Shirley Temple**, white with cream mark; **Mrs. T. J. Knudson**, blue; **Vagabond Prince**, smokey; **Picardy**, pink; **Minuet**, lavender.

The Best of the New Cannas

New Cannas are planted each year at Western Springs, also test plantings of the older varieties. Cannas are indispensable for parks, cemeteries, golf grounds or any place where a large mass of flowers and foliage is needed. We urge all Florists to try the new varieties here listed, best in our trials.
